EDUCATION

Harvard University — Cambridge, MA
Ed.M. in Learning Design Innovation and Technology, CGPA: 3.90/4.00 — Aug 2025 - Jun 2026

Massachusetts Institute of Technology (MIT) — Cambridge, MA
Cross-registered at MIT AI Venture Studio and Sloan School of Management; — Aug 2025 - Jun 2026

UBC Sauder School of Business — Vancouver, BC
Master of Business Analytics, CGPA: 3.70/4.00 — Aug 2023 - Aug 2024

University of Toronto — Toronto, ON
Bachelor's degree in Digital Enterprise Management, High Distinction, CGPA: 3.74/4.00 — Aug 2019 - Jun 2023

RESEARCH EXPERIENCE

Harvard Graduate School of Education — Cambridge, MA
Research Assistant, **Learning Innovation and Technology Lab** — Feb 2026 – Present

- Built a multimodal learning analytics dataset for learners across three semesters by integrating pose-derived behavioral traces, peer-interaction records, survey responses, and weekly reflections into a unified student-level data structure.
- Operationalized Bandura's four sources of self-efficacy into behavioral and survey indicators, then applied clustering, statistical tests, and cohort diagnostics to identify learner profiles and test their relationships with self-efficacy&belonging.
- Translated the resulting profiles into hypotheses for personalized feedback and learning support; audited engineered variables against raw files, identified a cohort-level inconsistency, and validated analyses for research implications.
- Contribute to design-based research in the lab, deploying faculty-led AI learning tools into classroom settings and supporting data collection for ongoing studies.

Tsinghua Shenzhen International Graduate School (Tsinghua-SIGS) — Shenzhen, China
Research Assistant — Sept 2024 – Aug 2025

- Developed an 8-module evaluation framework covering 120+ standards for a multimodal LLM testing platform, identifying 29 missing and 18 conflicting criteria and translating the audit into model-training and retrieval recommendations.
- Collaborated with engineering researchers on OldPilot, a multimodal decision-agent system for older-adult mobility; translated route-safety and mobility constraints into user-facing logic and led field testing that surfaced usability gaps for iterative product improvements.
- Led field testing and iterative improvements to refine system functionalities.

UsingAI — Aug 2024 – Mar 2025
AI Researcher — Shenzhen, China

- Enhanced YOLOv8 for real-time splitter port detection, achieving 98.55% accuracy in high-concurrency environments.
- Worked with the technical team to improve YOLOv8-based detection performance, helping evaluate model outputs, error cases, and user-facing reliability requirements.
- Coordinated preprocessing, training, fine-tuning, and validation workflows with the engineering team, helping move the model from experimentation toward practical implementation.

WORKING EXPERIENCE

Harvard Business School, Foundry (AI-native venture-building platform) Boston, MA
Foundry Fellow, Business Development, Analytics & Research Jul 2026 – Present

- Collaborate with Prof. Tom Eisenmann (HBS) on a within-cohort study of founder signals in the Catalyst accelerator, integrating evaluation data with founder assessments qualitatively coded from his office hours to test which early indicators best discriminate founder performance.
- Lead the design of an implementation-focused evaluation of founders' self-efficacy, adoption, and learning experience across AI-assisted venture-building workflows combining AI mentorship and faculty-informed guidance.
- Built the data infrastructure for B2B partnerships across six universities and partner organizations: a unified pipeline data model, a stage-conversion funnel used in board reporting, and standardized cohort onboarding.

Wyloo Metals Toronto, CA
Data Analyst Co-op May 2024 – Aug 2024

- Applied Agile project management to structure document architecture for chatbot and enterprise search initiatives, delivering an MVP plan covering project scope, resource allocation, and implementation risks.
- Developed a Python-based meeting-documentation workflow that improved documentation efficiency by 50% and produced structured inputs for AI tool development and implementation decisions.

HireBeat New York, NY
Business & Data Analyst Intern Jul 2023 – Nov 2023

- Conducted a gap analysis with HR and product teams to identify friction in the performance-review process, translated user needs into feature requirements, and delivered a self-assessment tool through Agile sprints in Jira, reducing review-cycle time by 30%.
- Implemented a structured digital onboarding checklist that organized required steps for new employees and reduced onboarding time by 25%.

Accenture Strategy & Consulting Shanghai, China
Business Analyst Intern May 2022 – Jul 2022

- Partnered with client stakeholders to translate sales-performance reporting needs into a SQL and Power BI dashboard, automating data aggregation and reducing manual processing time by 40%.
- Supported enterprise reporting design by defining fact and dimension tables and historical tracking rules with client partners to provide a consistent data foundation for performance measurement and trend analysis.

EXTRACURRICULAR

MotionEdge Labs [>] Cambridge, MA
Founder & Product Lead Sept 2025 – Present

- Lead the 0-to-1 development of an agentic AI movement-coaching product for exercise learning and rehabilitation, translating user and expert input into product requirements and an MVP roadmap for personalized practice, real-time feedback, pain check-ins, and progress tracking.
- Coordinate engineering, business, and health collaborators through iterative prototyping and user feedback; Advancing phone camera prototype with Google TensorFlow for better user scaffolding and joint feedback, earning a MIT Media Lab AI Venture Demo Day shortlist and Harvard President's Innovation Challenge semifinalist selection.

Google Hackathon 2024, Third Place Winner Vancouver, Canada
Team Lead Jan 2023 - Mar 2024

- Designed an E-commerce dashboard integrating real-time analytics for web, customer, product, and logistics data on Google Cloud platform using BigQuery, simplifying complex datasets into actionable insights.
- Consolidated multi-source data into a unified warehouse to enhance cross-platform analysis, improving efficiency.
- Leveraged AI for hyper-personalized marketing, automating real-time insights generation, and democratizing data usage for both technical and non-technical stakeholders via integrating Gmail, Google Analytics, and Gemini.

UBC Sauder Student Council (MBAN) Vancouver, BC
Vice President of International Aug 2023 – May 2024

- Supported 100+ international students through transition seminars, cultural and career events, and wellness activities that strengthened community and helped students manage stress.

SKILLS AND ADDITIONAL INFORMATION

- **Programming:** Python, SQL, R, Processing(Java), Excel VBA, Web(HTML,CSS, Javascript), Arduino, AI/ML.
- **Tools:** JIRA, Power BI, Tableau, Google(SEO/Looker/BigQuery/Ad search professional), Adobe(Ps/Ai/An/Pr/Coreldraw).
- **Certificates**: Project Management Essentials Certified (PMEC), PMP Candidate, BFF&BMC, Accenture Data Analytics.
